

CURRICULUM VITAE FOR ARTHUR FRANK WITULSKI

CONTACT INFORMATION

Office: Institute for Space and Defense Electronics,
Vanderbilt University, 1025 16th Av. South, Ste. 200, Nashville TN 37212
Telephone: (615) 343-8833
Fax: (615) 343 9550
Mobile: 615 400 9803
Email: arthur.f.witulski@vanderbilt.edu

EMPLOYMENT HISTORY

- 1/06-present Research Associate Professor of Electrical Engineering, School of Engineering, Vanderbilt University. Responsible for writing proposals, winning and directing sponsored research projects, supervising graduate students and engineers, managing research teams, publishing research results, teaching courses in electrical engineering and computer science, and administration of research grants.
- 1/04-12/11 Senior Research Engineer, Institute for Space and Defense Electronics (ISDE), Vanderbilt University. Modeling, analysis, and design of integrated circuits and power converters for space and defense environments. Technology Computer Aided Design (TCAD) single-event simulation of CMOS and power MOSFET structures and evaluation of Radiation Hardening by Design techniques.
- 8/00-6/03 Pursued Master of Divinity Degree at Regent College in Vancouver, British Columbia.
- 5/96-6/00 Associate Professor Electrical and Computer Engineering, University of Arizona (tenured). Direction of sponsored research in the area of resonant power conversion, modeling of power electronic circuits, measurement of electromagnetic interference in power converters, and distributed (modular) power supplies. Teaching in analog and digital integrated circuits, power electronics. Advising of graduate and undergraduate students.
- 8/89-5/96 Assistant Professor, Electrical and Computer Engineering, University of Arizona: Sponsored Research, Teaching in electronics, Advising of graduate and undergraduate students.
- 6/94-8/94 Summer Research Fellow, American Society for Engineering Education (ASEE) Summer Exchange Program, at the Naval Surface Warfare Center, Carderock Division, Annapolis Detachment (formerly the David Taylor Research Laboratory). Conducted research on modeling and predicting the stability of electrical power systems on surface ships and submarines.
- 1/89-7/89 Research Associate, Electrical and Computer Engineering, University of Colorado; Research in the area of quasi-resonant converter modeling.
- 6/84-12/88 Research Assistant, Electrical and Computer Engineering, University of Colorado; Research in the area of power electronics and resonant power conversion. Responsibilities included: Analysis and design of dc to dc converters, experimental measurement, computer programming, report writing, presentations to research sponsors, conference and journal papers.
- 8/83-5/84 Teaching Assistant, Electrical and Computer Engineering, University of Colorado; Responsibilities included: supervision of students, preparation of laboratory equipment,

grading of laboratory reports. Fall semester: Junior level electronics lab; Spring semester: Senior level communications lab.

- 8/81-7/83 Design Engineer for Storage Technology Corporation, 2270 S. 88th St., Louisville, CO 80027 (official title: Graduate Engineer). Designed power supplies and associated circuitry for magnetic tape subsystems. Responsibilities included: circuit design, worst-case analysis, supervision of lab technicians, design documentation, manufacturing and test specifications, vendor qualification, safety agency and FCC requirements. Also provided engineering support to the manufacturing line for existing products. (Official title: "Graduate Engineer").
- 6/80-8/80 Electrical Design Intern, Tri-State Generation and Transmission, 12076 Grant St., Thornton, CO 80241. Automation of a high voltage disconnect switch for remote control. Economic study of the use of Aluminum Conductor Steel Reinforced (ACSR) cables.

CHRONOLOGY OF EDUCATION

- 12/88 Ph.D. in Electrical Engineering, University of Colorado, Boulder.
 Ph.D. Dissertation: "Small Signal Equivalent Circuit Modeling of Resonant Power Converters,"
- 5/86 M. S. in Electrical Engineering, University of Colorado, Boulder.
 Master of Science Thesis: "Steady State Analysis and Design of the Series Resonant Converter,"
- 5/81 B. S. in Electrical Engineering, University of Colorado, Boulder.

SOFTWARE SKILLS

Operating systems: Mac OS X, Linux, Windows
TCAD: Synopsys Sentaurus Suite, semiconductor device simulation and visualization
IC Design: Cadence Virtuoso IC6, schematic, simulation, layout,
Mentor Calibre: Design rule checking, layout-versus-schematic checking
LTSpice: analog circuit simulation, other SPICE platforms
Mathematica
Microsoft Office and equivalents

PUBLICATIONS

Book Chapter

Balaji Narasimham, Bharat L. Bhuva, Ronald D. Schrimpf, Lloyd W. Massengill, William Timothy Holman and Arthur F. Witulski, Vanderbilt U, Autonomous detection and characterization of radiation-induced transients in semiconductor integrated circuits, Chapter 13, Radiation Effects in Semiconductors: Devices, Circuits, and Systems, Edited By Kris Iniewski, Taylor and Francis.

Patent

Arthur F. Witulski and Bruce Schwickrath, Inventors, "A Fault Protection System for Power Supplies That Use Ferro-Resonant Transformers," U.S. Patent No. 4466041, Aug. 14, 1984, Assignee: Storage Technology Corporation.

GRANTS AND CONTRACTS WON

Vanderbilt University:

Title: System-Level Impacts of Total Ionizing Dose in Analog Electronics: A Summer Student Research Experience

Principal Investigator: Witulski

Sponsor: Cal Tech/NASA Jet Propulsion Laboratory

Dates: Phase I: 05/25/2016-08/31/2016 Total Budget: \$11,000

Title: Integration of Goal Structuring Notation with Model-Based Engineering and Bayesian Networks

Principal Investigator: Witulski

Co-PIs: G. Karsai, B. Sierawski

Sponsor: NASA Goddard and NASA HQ OSMA

Dates: Phase I: 08/15/2016-12/31/2016 Total Budget: \$50,000

Phase II: 01/01/2017-09/30/2017 Total Budget: \$75,000

Title: Analysis of Radiation -Induced Changes in Robotic Materials, Components, and Subsystems: Option-Year 4

Principal Investigator: Witulski

Co-PIs: Eric Barth, Robert Reed, Robert Weller, Gabor Karsai R. Schrimpf

Sponsor: U.S. Defense Threat Reduction Agency (DTRA)

Dates: Awarded, start date in May 2016 Period of Performance 1 year, Budget: \$349,999

Title: Characterization and Mitigation of Radiation and High Temperature Effects in SiC Power Electronics

Principal Investigator: Witulski

Co-PIs: R. Schrimpf

Sponsor: CFDRC Corporation-NASA Phase I SBIR

Dates: Awarded, start date in May 2016 Period of Performance 6 mo., Budget: \$32,353

Title: Reliability Paradigms for Space: Goal Structuring Notation for Aerospace Reliability Applications

Principal Investigator: Witulski

Co-PIs: G. Karsai, B. Sierawski

Sponsor: NASA Goddard and NASA HQ OSMA

Dates: Phase I: 09/01/2015-01/31/2016 Total Budget: \$51,000

Phase II: 02/01/2016-05/31/2016 Total Budget: \$25,000

Title: Radiation Tolerant Power Switches for Moog Switching Inverter Applications

Principal Investigator: Witulski

Co-PIs: R. Schrimpf, L. Massengill, K. Galloway, D. Fleetwood, R. Reed, B. Templeton

Sponsor: Moog Corporation

Dates: 06/1/2015-12/31/2015 Total Budget: \$141,000

Title: High-efficiency, Radiation-hardened GaN HEMT Technology for L-band Space Power Amplifier

Principal Investigator: Witulski

Co-PIs: R. Schrimpf

Sponsor: CFDRC Corporation-U.S. Air Force Phase I SBIR

Dates: 06/24/2014-02/24/2015 Total Budget: \$35,000

Title: Radiation Hardening of Point of Load Converters

Principal Investigator: Witulski

Co-PIs: L. Massengill

Sponsor: Scientific Corporation, Texas Instruments-MDA Phase II SBIR

Dates: 03/10/2013-03/10/2015 Total Budget: \$249,979

Title: Analysis of Radiation –Induced Changes in Robotic Materials, Components, and Subsystems

Principal Investigator: Witulski

Co-PIs: Eric Barth, Robert Reed, Robert Weller, Gabor Karsai

Sponsor: Defense Threat Reduction Agency (DTRA)

Dates: 12/17/2012-12/17/2015 Total Budget: \$1,049,622

Title: Radiation-Hardened Point-of-Load (POL) Converter for Space Applications

Principal Investigator: Witulski

Co-PIs: Alles, Massengill

Sponsor: Scientific Corporation/MDA

Dates: 7/11-10/11 Total Budget: \$31,935

Bridge Funding to Phase II:

Dates: 6/12-9/12 Total Budget: \$15,986

Title: Worse Case Exposure Report & Written RLAT Test

Principal Investigator: Witulski

Co-PIs:

Sponsor: SEAKR Corporation

Dates: 7/10-10/10 Total Budget: \$71,284

Title: The Characterization of Single-Event Effects in Ultra Deep Submicron (<90nm) Microelectronics

Principal Investigator: Witulski

Co-PIs:

Sponsor: Robust Chip/DTRA

Dates: ~2/15/07-7/31/07 Total Budget: \$46,000

Title: Investigation of Macro- and Micro-Models for Prediction of SET-Induced Instability in Linear Regulators

Principal Investigator: Witulski

Co-PIs: Massengill, Schrimpf

Sponsor: ALCATEL

Dates: 9/05-2/06 Total Budget: \$24,863

Title: Radiation Hardened by Design and Integration Production of 8-16 Mega-Bit SRAM

Principal Investigator: Witulski

Co-PIs:

Sponsor: Structured Materials Inc.

Dates: 1/01/05-11/30/05 Total Budget: \$70,000

University of Arizona:

"Development of a Design Procedure for High Frequency Transformers using the Physically Based Transformer Model"

Principal Investigator: A. F. Witulski

Sponsor: Hughes Electron Devices, Torrance CA

July 23, 1998-May 31,1999, Amount: \$24,100

Continuation of "Modeling and Design of High Voltage Transformers for Switching Converters"

Principal Investigator: Arthur F. Witulski

Sponsor: Hughes Electron Devices, Torrance CA

January 10-Dec. 31, 1997, Amount: \$50,000.

"Dynamic Modeling of Class D Converter by a Variable Capacitance Switch,"

Principal Investigator: Arthur F. Witulski
Sponsor: Hughes Missile Systems, Tucson AZ
January 10-Dec. 31, 1996 Amount: \$30,000

"Characterization of a Capacitor Ladder for High Voltage DC/DC Applications,"
Principal Investigator: Arthur F. Witulski
Sponsor: Hughes Missile Systems, Tucson AZ
January 10-Dec. 31, 1996 Amount: \$50,000

"Modeling and Design of High Voltage Transformers for Switching Converters"
Principal Investigator: Arthur F. Witulski
Sponsor: Hughes Electron Devices, Torrance CA,
January 10-Dec. 31, 1996 Amount: \$50,000

"Characterization of a High Voltage MOSFET Switch for Radar Applications,"
Principal Investigator: Arthur F. Witulski
Sponsor: Hughes Missile Systems, Tucson AZ
January 10-Dec. 31, 1996 Amount: \$50,000

"Design of a high power, high frequency Class D converter for radar transmitter applications,"
Principal Investigator: Arthur F. Witulski
Sponsor: Hughes Research Laboratories, Malibu, CA
January 10-Dec. 31, 1996 Amount: \$50,000

"Investigation of Losses and Development of a Design Procedure for Efficient Operation of a High-Voltage Class D DC/DC Converter,"
Principal Investigator: Arthur F. Witulski
Sponsor: Hughes Radar and Communications Systems, El Segundo, CA
January 10-Dec. 31, 1996 Amount: \$50,000

Taken together, the projects above represented a coordinated one-year effort sponsored by four different divisions of Hughes to investigate high frequency, high voltage power converters for radar transmitters during 1996. Several Hughes companies were purchased by Raytheon in 1997.

"Investigation of Resonant Topologies for High Voltage Power Supplies,"
Principal Investigator: Arthur F. Witulski
Sponsor: Hughes Missile Systems Company, Tucson, AZ
Dates: 5/95-8/95, Amount \$30,000.

"Input Filter Design for a Multiple Converter Power System,"
Principal Investigator: Arthur F. Witulski
Sponsor: Allied Signal Corporation
Dates: 1/26/94-12/31/94, Amount \$15,000

"Investigation of Multi-Output DC-to-DC Converter Topologies: Small Signal Models,"
Principal Investigator: Arthur F. Witulski
Sponsor: Sandia National Laboratories
Dates: 1/93-5/93 Amount: \$11,027

"Closed-Loop Regulation Properties of Multi-Output DC-to-DC Converters":
Principal Investigator: Arthur F. Witulski,
Sponsor: Sandia National Laboratories
Dates 2/28/92-2/28/93, Amount: \$29,352

"Characterization of Power MOSFETs and Power Converters for use in Space-Radiation Environments"

Principal Investigator: K.F. Galloway

Co-P Is: A. F. Witulski and R. D. Schrimpf

Sponsor: Government Electronics Group, Motorola, Inc., Chandler, AZ.

Dates: 1/91-1/92 Amount: \$24,960.

"Investigation of Multi-Output DC-DC Converter Topologies and Control"

Principal Investigator: Arthur F. Witulski

Sponsor: Sandia National Laboratories

Dates: 10/90-12/91 Amount: \$25,000.

"Closed-Loop Operation of a Zero-Voltage-Switched, Coupled-Inductor Switching Converter for Low Output Noise and Ripple,"

Principal Investigator: A. F. Witulski, Co-Investigator: W. Kerwin,

Sponsor: IBM Corporation, Tucson AZ,

Dates: 1/92-1/93, Amount: \$54,781

"A Multiple-Output, Zero-Voltage-Switched Forward Converter With Low Output Ripple and Low Radiated Noise"

Principal Investigator: A. F. Witulski

Co-Principal Investigators: W. Kerwin

Sponsor: IBM Corporation, Tucson AZ

Dates: 1/91-1/92 Amount: \$54,020

"Investigation of Resonant Power Converters with Very Low Ripple and Noise Output Levels,"

Principal Investigator: W. Kerwin

Co-Principal Investigators: A. F. Witulski

Sponsor: IBM Corporation, Tucson AZ

Dates: 1/90-1/91 Amount: \$50,000

AWARDS

Best Poster Paper Award, Arthur F. Witulski, Eric Barth, Gabor Karsai, Zachary Diggins, Nagabushan Mahedevan, E. Bryn Pitt, Daniel Herbison, Ronald Schrimpf, Robert Reed, Robert Weller, Brian Sierawski, "A Comprehensive Program for Investigation of Radiation Effects in Robots Used in Mitigation of Nuclear Disasters," Proceedings of the Government Microcircuit and Critical Applications Technology Conference (GOMACTech-14), 2014, Charleston, South Carolina, USA, April 1 - 3, 2014, pp. 513-516.

IEEE Power Electronics Society 1996 Transactions Prize Paper Award, for "Input Filter Design for Multiple-Module DC Power Systems," with Martin Florez-Lizarraga, Published in the IEEE Transactions on Power Electronics, Vol. 11, No. 3, May 1996.

1993-94 University of Arizona Annual ECE Departmental Award for Innovative Teaching, for introduction of novel material on problem-solving skills into courses on electronic circuit design, ECE 351A and ECE 351B.

COURSES TAUGHT AT VANDERBILT UNIVERSITY

EECS 285 VLSI Design and Layout: First course in integrated circuit design and layout. Students use Cadence software and a open-source process design kit to fabricate integrated circuit designs on 0.5 micron MOSIS tiny-chips and test their chips when they return from the fab several months later.

EECS 112 Circuits I. First semester circuits course for EE majors and non-major engineering students. Basic circuit concepts up to and including first-order differential equations.

EECS 307 Technology Computer Aided Design (TCAD) Modeling of Semiconductor Devices. A graduate course on modeling MOSFETs with TCAD simulation. A review of basic semiconductor theory, introduction to Synopsys Sentaurus TCAD suite, introduction to solving partial differential equations, issues in modeling of highly scaled MOSFET device structures.

EECE 292 Power Electronics and Alternative Energy (S 2012) See description of U.A. ECE 561 above.

CS 151 Computers and Ethics Introductory course on, ethics, and social issues of technology, especially with regard to computing and the internet. Basic ethical theories applied to issues in the computing world, such as privacy, intellectual property, free speech, and cyber-security.

EECE 275 Microelectronic Systems (S 2015) Intended as a bridge course for computer engineers who don't have electronics as a requirement in the curriculum, to enable them to successfully do circuit-board-level electronic system design. The course is a semester overview of transistors, logic families, communication busses, analog/digital conversion, sensors, actuators, packaging, board layout, and micro-controller implementation.

COURSES TAUGHT AT UNIVERSITY OF ARIZONA

ECE 351 (later 351a) based "Microelectronic Circuits" by Sedra & Smith, **Analog Electronics I** Basic semiconductor physics, introduction to the diode as a nonlinear circuit element, op amps, intro to bipolar and MOS transistors, biasing, single-transistor amplifiers.

ECE 351b Sedra & Smith **Analog Electronics II** Multi-transistor circuits, differential amplifiers, current sources, output stages, overall op amp design.

ECE 302 Second semester **Analog Design Laboratory** course, a project course where students built a discrete power op amp over the course of the semester and demonstrated its use in a project of their own choice.

ECE 455 **Digital integrated Circuit Design** at the transistor level. Comprehensive transistor-level design of logic gates, transient switching times in typical digital circuits, TTL, CMOS, other logic families.

ECE 453/553 Senior/First year graduate course on **Design-Oriented Analysis of Electronic Circuits**. This unique course is based on a body of work developed by Dr. R. D. Middlebrook at Cal Tech over many years. He observed that EE students often suffer from "analysis paralysis" when faced with real-world electronic design problems, and often give up on an analytical solution and resort to unguided, inconclusive simulations. He developed a philosophy of design and a set of circuit theorems and techniques to enable engineers to get to the heart of an analog design problem very quickly. Topics include: doing algebra on the Bode Plot, the Extra Element Theorem (for calculating the effect of a new circuit element on a circuit quantity like gain or impedance without redoing the original analysis), The Feedback Theorem, and others.

ECE 550 **Analog Integrated Circuits**: Design of analog bipolar and CMOS integrated circuits.

ECE 561 **Power Electronics**. This course covers the fundamentals of switching DC/DC converters: averaging of switching networks, characteristics of power semiconductor devices, magnetic device modeling and design, and feedback loop design and analysis. These principles can be easily extended to other power electronic applications such as DC/AC inverters for solar arrays or motor drivers, or AC/DC applications such as low-harmonic rectifiers or battery chargers.

ECE 650 **Advanced Analog IC Design** course: a/d and d/a data converter topologies and design.

ECE 599 **Seminar on Advanced Power electronics**: Current-mode modeling, control, resonant converters.

CONSULTING

Apex Microtechnology, Tucson AZ. Worst case analysis and control loop modeling and measurement for a multi-output dc/dc converter on a thick-film substrate.

National Semiconductor, Tucson, AZ. Control loop analysis of analog controller IC's and integrated dc/dc converters.

Raytheon Missile Systems Company, Tucson AZ. Modeling and analysis of resonant modulator switches for high voltage TWT radar systems.

UNIVERSITY OF ARIZONA EXTERNAL PRESENTATIONS

- Invited Seminar, "Pulse-Width-Modulated Converters: Modeling and Measurement," presented to Power Supply Technical Advisory Group (PSTAG) Meeting of Honeywell Corporation, 8 hour presentation, September 30, 1991, in Minneapolis, Minnesota. Approx. 15-20 attendees.
- Invited Seminar, "Modeling and Design of Coupled Inductors and Transformers," presented to Power Supply Technical Advisory Group (PSTAG) Meeting of Honeywell Corporation, 4 hour presentation, October 26, 1992, in Phoenix, AZ. Approx. 25-30 attendees.
- Industrial Short Course: "Power Electronics: Devices and Applications," with Dr. R. Schrimpf of UA and Mr David Blackburn of the National Institute of Standards and Technology (NIST), presented through Engineering Professional Development, DoubleTree Hotel, Tucson, March 16-18, 1992. Three-day course, responsible for approx. 1 day of lectures. Thirteen attendees from industry, 8-9 UA grad. students. Also given at the Fiesta Inn, Phoenix, February 8-10, 1993, with fourteen attendees from industry.
- Invited Talk, "Topics in the Design and Analysis of Distributed Electronic Power Systems," at the Corporate Power Electronics Committee (CPEC) Meeting of Hughes Aircraft Corporation, Los Angeles, CA, April 27, 1994.
- Instructor for "Structured Analog Design," a 3 day industrial short course originated by Dr. R.D. Middlebrook at Caltech. Both courses were presented to audiences of engineers of the Jet Propulsion Laboratory in Pasadena California. The course consists of 8 hours of lecture each day, and covers 560 rather complicated view graphs. The first course was given June 28-30th, the second in December 12-14th of 1995, both offered through JPL's continuing education program.
- Seminar: "Equivalent Circuit Modeling of Small Signal Dynamics in Switching Power Converters," Presented for the U. of A. Applied Mathematics Seminar Series on Nov. 9, 1995
- Invited Talk: "An Introduction to Zero-Voltage and Zero-Current Switching Resonant Converters," Hughes Power Electronics Symposium, Los Angeles, CA, September 24, 1996.
- Tutorial: "PWM Converter Modeling and Measurement," *IEEE CIEP 96 (Congresso Internacional Electronica de Potencia)*, Cuernavaca, Mexico, October 1996.
- Seminar: "Topics in High Voltage DC Resonant Power Conversion for Radar Transmitters," Power Electronics Research Seminar, University of Colorado, Boulder CO, March 10, 1997.
- Seminar: "Small Signal Modeling of DC-DC Converters," *IEEE Applied Power Electronics Conference*, New Orleans, Louisiana, February 1999.

SERVICE

- Reviewer, Energy Conversion, *IEEE Transactions on Aerospace and Electronic Systems*
- Reviewer, Static Power Converters, *IEEE Transactions on Industry Applications*
- Reviewer, Power Converters, *IEEE Transactions on Power Electronics*, Aug. 1990 to present.
- Member, Program Review Committee, IEEE Power Electronics Specialists Conference 1991-2000
- Session Chair, IEEE Power Electronics Specialist Conference, Resonant DC/DC Converters
- Member, Program Review Committee, IEEE Applied Power Electronics Conference (APEC)
- Treasurer, IEEE Power Electronic Society Administrative Committee, 1999-2000.
- Reviewer, Nuclear and Space Radiation Effects Conference, 2007-2011.
- Reviewer, HEART Conference, 2011
- Reviewer, IEEE Transactions on Power Electronics
- Reviewer, IEEE Transactions on Nuclear Science.

INTRAMURAL SERVICE

Departmental Committees, University of Arizona

Microelectronics Sub-Committee: Curriculum Review, Aug. 1990-Jan. 1991.

Microelectronics Sub-Committee: Restructuring ECE 351/352, Chair, Dec. 1990-Jan. 1991.

Microelectronics Sub-Committee: Laboratory and Office Space, Aug. 1990-Jan. 1991.

Microelectronics Sub-Committee: Recruiting Aug. 1990-Jan. 1991.
Microelectronics representative on Dept of ECE Curriculum Committee, and ad-hoc Sub-Committees on Circuits and Electronics Curriculum, August 1991-May 1992.
Member of committee for: Master's Thesis Defenses, Ph.D. Qualifying Examinations, Ph.D. Preliminary Examinations, Ph.D. Defenses.
Microelectronics group representative on the ECE Graduate Studies Committee.
Member of ad-hoc microelectronics search committee for a new faculty member.
Chairman of Undergraduate Curriculum committee, 1999-2000.

GRADUATE STUDENT ADVISING

Students for whom I supervised their Ph.D. thesis, Vanderbilt:

Zachary Diggins, "System Health Awareness in Total-Ionizing Dose Environments," Scheduled for October 1, 2016.

Students for whom I supervised their M.S. thesis, Vanderbilt:

Sandeepan DasGupta, "Trends in Single Event Pulse Widths and Pulse Shapes in Deep Submicron CMOS, M.S. Thesis, Vanderbilt University, Dec., 2007.

Tania Roy, "Single Event Mechanisms in 90nm Triple Well CMOS Devices, M.S. Thesis, Vanderbilt University, Aug., 2008.

Patrick Voytek, "Gamma Total Ionizing Dose Impact On The Control Performance Of Integrated Point-Of-Load Converters," July 2014.

Students that I co-supervised with Dr. Tim Holman:

Nick Atkinson, "Single-event characterization of a 90-nm bulk CMOS digital cell library," Vanderbilt University, May 2010.

Nelson Gaspard, "Impact of well structure on SE response in 90-nm bulk CMOS," Vanderbilt University, May, 2011.

Ph.D. Dissertations Supervised, University of Arizona:

Matthew Goldman, "Topics in the Design and Analysis of Multi-Output Current-Mode Controlled DC/DC Converters," 1993.

Leng-nien Hsiu, "Low-Ripple and Noise DC/DC Converter with Quasi-resonant Switching and Integrated Magnetics, 1995.

John Glaser, "Topics in Large Signal Analysis of Switching Power Converters," 1996.

Yung-Lin Lin, "Resonant Converters and Their Application to Electronic Ballasts and High Voltage Power Conversion," 1997.

Jung-Hui Cheng, "Steady-State and Small-Signal Analysis of High-Order Resonant Converters," 1997.

Students for whom I supervised their M.S. thesis, University of Arizona

John Glaser	Martin Florez
Lengnien Hsiu	Judith Barleycorn
Reggie Kellum	Lengnien Hsiu
Judith Barleycorn	Doug Smith,
Susan Theodore	Fernand Anvia
Bin Wu	Jian Wang

APPENDIX: COMPLETE LIST OF JOURNAL AND CONFERENCE PUBLICATIONS, CHRONOLOGICAL ORDER

Reviewed Journal Papers

1. A. F. Witulski, R. W. Erickson, "Steady State Analysis of the Series Resonant Converter," IEEE Transactions on Aerospace and Electronic Systems, Vol. AES-21, No. 6, November 1985, pp. 701-799. Reprinted in "Recent Developments in Resonant Power Conversion," Edited by K. Kit Sum, Intertec Communications Press, 1988, pp. 525-532.
2. A. F. Witulski, R. W. Erickson, "Design of the Series Resonant Converter for Minimum Component Stress," IEEE Transactions on Aerospace and Electronic Systems, Volume AES-22, No. 4, July 1986, pp. 356-363.
3. S. D. Johnson, A. F. Witulski, R.W. Erickson, "A Comparison of Resonant Topologies in High Voltage Applications", IEEE Transactions on Aerospace and Electronic Systems, May 1988, Vol. 24, No. 3, pp. 263-274.
4. R. W. Erickson, A. F. Hernandez, A. F. Witulski, R. Xu, "A Nonlinear Resonant Switch," IEEE Transactions on Power Electronics, April, 1989, Vol. 4, No.2, pp. 242-252.
5. A. F. Witulski, R.W. Erickson, "Extension of State-Space Averaging to Resonant Switches-and Beyond," IEEE Transactions on Power Electronics, January, 1990, Vol. 5, No. 1, pp. 98-109.
6. A. F. Witulski, A. F. Hernandez, R. W. Erickson "Small Signal Equivalent Circuit Modeling of Resonant Converters," IEEE Transactions on Power Electronics, January, 1991, Vol. 6, No. 1, pp.11-27.
7. A. F. Witulski, "Buck Converter Small-Signal Models and Dynamics: Comparison of Quasi-Resonant and Pulse-Width-Modulated Switches" IEEE Transactions on Power Electronics, October, 1991, Vol. 6, No. 4, pp. 727-738.
8. J. S. Glaser, A. F. Witulski, R. G. Myers, "Steady-State-Analysis of the Constant Frequency Diode-Clamped Series Resonant Converter," IEEE Transactions on Aerospace and Electronics Systems, January 1994, vol. 30, No. 1, pp. 135-143.
9. J. S. Glaser, A. F. Witulski, "Application of a Constant-Output-Power Converter in Multiple-Module Converter Systems," IEEE Transactions on Power Electronics, January 1994, Vol. 9, No. 1, pp. 43-50.
